

## Grabber X3 for the BRABUS Crawler: General Tire makes Offroad Tuning Dreams Come True

- **BRABUS Crawler impresses at Conti Tuning Day – BRABUS Special Edition excels beyond the high-speed track.**
- **Off-road Specialist Grabber X<sup>3</sup> impresses Tuning fans with 4x4 performance on all terrains.**
- **General Tire supplies the ideal tires for all SUVs and 4x4 vehicles.**

Hanover, 5<sup>th</sup> September 2022. 900 SUPERBLACK, 1300 R or 700 Rolls Royce: at the 44th instance of the Conti Tuning Day – a Special Edition – everything revolved around vehicles from BRABUS on August 20, 2022. The vehicle tuner brought along an impressive ten high-performance vehicles for comprehensive testing, including a brand-new customized Mercedes EQS and the BRABUS 900 Crawler. To ensure the right tire performance beyond the high-speed track, this was equipped with the Grabber X<sup>3</sup>, General Tire's off-road specialist.

The BRABUS 900 Crawler – or “Supercar” as the tuners from the Ruhr region have dubbed it – boasts 900 hp under its carbon hood, so no need to hide from its on-the-road competitors. The Crawler accelerates from 0 to 100 km/h in 3.4 seconds and is limited to a top speed of 160 km/h. If its tires are to survive, even on difficult terrain, they must indeed meet stringent requirements. As a 4x4 tire model developed not only for on-road use but also for off-road use, the Grabber X<sup>3</sup> from General Tire is naturally the perfect choice here.

With its aggressive tread pattern and innovative product features, the Mud Terrain tire offers maximum durability. The tire impresses with its three main technologies: An innovative tread to ensure maximum traction in mud, an excellent grip to guarantee safety, even on loose surfaces, and an exceptional cut resistance for reliable performance, even on rocky terrain. The Grabber X<sup>3</sup> is available in 38 different sizes for 15- to 20-inch rims.

True to the slogan “Anywhere is Possible,” the General Tire brand supports adventurers on and off the road with its tires for SUVs and 4x4s. The Grabber X3 is a mud terrain tire designed to meet the most extreme needs of pick-up-truck and off-road vehicle drivers looking for a combination of exceptional off-road capabilities and safe on-road performance.

**Continental** develops pioneering technologies and services for the sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2021, Continental generated sales of €33.8 billion and currently employs more than 190,000 people in 58 countries and markets. On October 8, 2021, the company celebrated its 150th anniversary.

The **Tires group sector** has over 24 production and development locations worldwide. Continental is one of the leading tire manufacturers and generated sales in this group sector of €11.8 billion in fiscal year 2021 with more than 57,000 employees. Continental ranks among the technology leaders in tire production and offers a broad product range for passenger cars, commercial and special-purpose vehicles as well as two-wheelers. Through continuous investment in research and development, Continental makes a significant contribution toward mobility that is safer, more cost-effective and more ecologically efficient. The portfolio of the Tires business unit also includes services for the tire trade and fleet applications as well as digital tire management systems.
